Who We Are

At EnerBlaze Petrochemicals, we prioritize sustainability, safety, and environmental stewardship in all our endeavors.

EnerBlaze TW is a leading provider of quality petrochemical solutions globally. Our portfolio encompassing the procurement, distribution, and supply of essential chemicals for various industries, we are committed to excellence in every aspect of our operations.

Established with a vision to innovate and serve, EnerBlaze petrochemicals operates best and sufficient facilities in strategic locations, ensuring efficient production and distribution capabilities. Our comprehensive range of products includes Gas Oil, Fuels, Mineral Oil, Turpentine Oil, Base Oil, and other essential petrochemicals, tailored to meet diverse customer needs worldwide.

At EnerBlaze Petrochemicals, we prioritize sustainability, safety, and environmental stewardship in all our endeavors. Rigorous quality assurance measures and adherence to international standards underscore our dedication to delivering reliable, safe, and high-performance solutions. Through strategic partnerships, continuous innovation, and a customer-centric approach, we strive to exceed expectations and drive positive change in the petrochemical industry.

Join us in shaping a sustainable future with trusted petrochemical solutions from EnerBlaze Petrochemicals.

“Reliable Petrochemical Solutions for a Sustainable Future”

Operational Excellence

Procurement

Strategic Sourcing for Quality and Efficiency

Procurement involves the strategic sourcing of essential raw materials of fuels and lubricants. This process encompasses the identification and acquisition of key inputs such as Diesel, Turpentine, Base Oil, Fuel Oil, and a variety of necessary petrochemicals. The goal is to ensure a consistent and reliable supply chain, meeting the high standards of quality and performance required in today's market. Advanced procurement strategies include market analysis, supplier negotiations, and leveraging technology for efficient

inventory management. By establishing strong relationships with reputable suppliers and continuously monitoring global market trends, we can secure the best possible terms and conditions. This proactive approach optimizes cost efficiency. Additionally, enhances the overall sustainability and competitiveness of our processes. Embracing digital tools and analytics further streamlines operations, ensuring that all procurement activities align with the dynamic demands of the industry.

Storage

“Strategic Storage, Unmatched Capacity: Fueling Efficiency and Flexibility”

Our in-house storage facility boasts a substantial capacity of 2000 metric tons, primarily designated for light materials such as Gas Oil and White Spirit. This ensures we can maintain an ample supply to meet operational demands without interruption. For additional storage needs, we have strategic agreements in place with tank facilities in the Hamriyah Free Zone, Sharjah, UAE with currently holding 5000 MT capacity. These agreements provide us with the flexibility to expand our storage capabilities as required. Additionally, we utilize the Fujairah Tank Park in UAE to accommodate larger vessel volumes,

ensuring seamless integration with our logistics and supply chain operations. By leveraging these advanced storage solutions, we can optimize inventory management, reduce lead times, and enhance our overall efficiency. Our approach is designed to ensure that we can meet fluctuating market demands while maintaining the highest standards of safety and environmental compliance. Through these modern storage strategies, we are well-equipped to support our production processes and sustain our competitive edge in the industry.

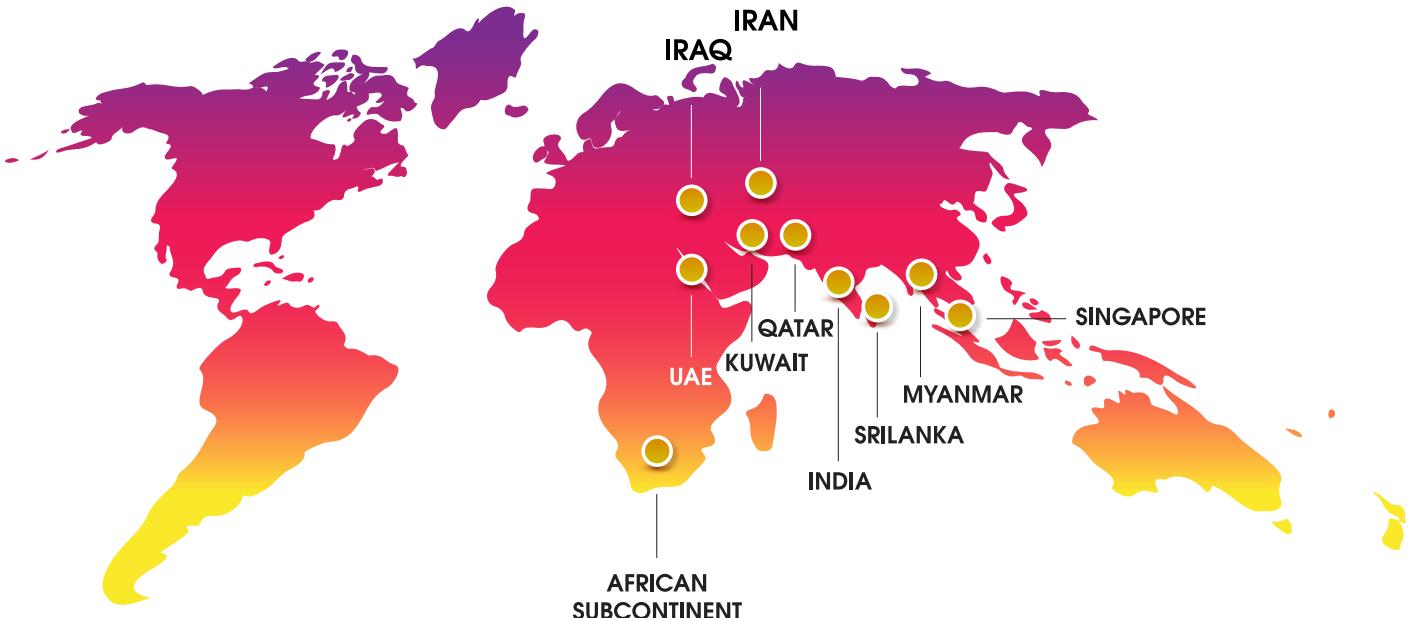

Processing

Global Reach, Local Ambitions: Expanding Refining Excellence in 2025

Our refining and production unit, located in Kuwait, is dedicated to producing Mineral Oil and Turpentine Oil with a daily capacity of 140 metric tons. These high-quality products are exported globally, ensuring a widespread market reach and fulfillment of international demand. Currently, our operations do not include refining within the UAE; however, we have ambitious plans for a new refinery project slated for 2025 in the Hamriya Freezone,

Sharjah, UAE. The project, with a proposed production capacity of 200 metric tons, has completed land acquisition and company establishment processes, setting the stage for groundbreaking advancements in local refining capabilities. This strategic initiative aims to bolster regional production capacities, enhance supply chain efficiency, and meet growing market needs for refined petrochemical products.

Distribution

Delivering Excellence in Petrochemical Supply

Our distribution network spans across international markets, facilitating the supply of petrochemical products to diverse customers and industries. With monthly supply capacity ranging from 30,000 to 50,000 metric tons, we ensure reliable delivery to meet global demand. Currently, we maintain partnerships with clients in key countries such as India, Myanmar, Sri Lanka, Kuwait, and African Subcontinent establishing a robust presence in these strategic markets. Within the UAE, our operations focus on handling, Mineral Oil Supply, Turpentine and Base Oil supply, leveraging local resources

and infrastructure for efficient distribution. Additionally, our network includes UAE-based resellers who cater to multiple countries on a CIF (Cost, Insurance, Freight) basis, ensuring seamless transactions and timely deliveries. This strategic approach not only enhances market penetration but also optimizes logistics and supply chain management, reinforcing our commitment to customer satisfaction and operational excellence. By continuously adapting to market dynamics and leveraging technology-driven solutions, we uphold our reputation as a reliable partner in the global petrochemical industry.

“Precision and Safety in Petrochemical Storage”

Our Commitment to Excellence

EnerBlaze Petrochemicals sustains its competitive edge by offering attractive pricing strategies that appeal to customers while ensuring profitability in a fiercely competitive industry. Through diligent market analysis and strategic pricing adjustments, we balance affordability with profitability, thereby maximizing customer value. Our commitment to competitive pricing reflects our proactive stance in meeting market demands and fostering long-term customer relationships, reinforcing our position as a preferred supplier in the global petrochemical sector.

EnerBlaze Petrochemicals maintains high standards of quality assurance which is fundamental to our operations. We deploy best framework that encompasses rigorous testing protocols, continuous improvement initiatives, and adherence to stringent quality standards. Each stage of our production process is meticulously monitored to ensure that our petrochemical products consistently meet industry benchmarks for specifications required by clients, and safety.

By prioritizing quality assurance, we not only mitigate potential risks but also enhance product reliability and customer satisfaction. Our commitment extends beyond regulatory compliance to fostering a culture of continuous improvement, ensuring that EnerBlaze Petrochemicals remains a trusted partner in delivering superior quality petrochemical solutions globally.

Competitive Pricing

Quality Assurance

Adhering to environmental regulations is crucial given the significant environmental footprint associated with petrochemical operations. We prioritize strict compliance to mitigate potential impacts on the environment. Through proactive measures and sustainable practices, we ensure our operations meet and often exceed regulatory standards. This commitment not only safeguards natural resources but also underscores our dedication to environmental stewardship and sustainable business practices.

Environmental Compliance

Maintaining rigorous safety standards is paramount in mitigating risks linked to the handling and processing of hazardous chemicals. We prioritize comprehensive safety protocols to protect our workforce, facilities, and surrounding communities. By implementing state-of-the-art technology and regular training programs, we ensure a proactive approach to risk management. This commitment underscores our dedication to creating a safe working environment and upholding the highest standards of occupational health and safety in all aspects of our operations.
